This ROD is the culmination of nine years of effort and fulfillment of legislative intent. Among other things, the ROD authorizes burying a pipeline, using gravel fill and ice roads, and routing the pipe through a small non-wilderness section of Denali National Park. The ROD will also significantly de-risk the Alaska LNG project.

The team has done a great job in reaching the Joint Record of Decision for ASAP. Dan Coffey stated that since he has been on the Board, and because he has been seeing things change with the new Administration, his opinion about Alaska LNG has changed dramatically. The Board should focus on how it can operate effectively, particularly with how AGDC is moving forward, and make decisions and provide facts to the Legislature that benefit us all. Chair Smith added that new board members, including himself, were rapidly learning a lot about AGDC and Alaska LNG. Chair
